When Passion City Church expanded into Trilith, a creative hub anchored by a major film studio, they needed more than a typical worship space. Housed in a cavernous soundstage, the campus required immersive, portable, distraction-free systems that supported live-linked worship. To bring their vision to life, they partnered with trusted collaborator Diversified for studio-quality, tour-ready design and execution.

WHAT WE DELIVERED

- Modular, touring-style AV system built for mobility and scalability
- Massive, seamless LED wall for immersive visuals
- Cinema-grade cameras and processing for film-quality production
- Spatial audio system designed for clarity and warmth
- Programmable lighting tailored to worship, events, and cinematic moments

IMPACT

Since opening, Passion City Church Trilith has become more than a venue, emerging as a catalyst for growth, connection, and inspiration. Attendance, engagement, and community impact have all surged. The space now serves as a benchmark for how thoughtful design and technology can transform unconventional environments into powerful, purpose-driven gathering places.
