# Mission-Ready Collaboration Upgrade

Transforming Secure Spaces for Seamless, Mission-Critical Collaboration

Industry: **Federal Government**

Location: **Undisclosed**

The United States Air Force (USAF) needed to modernize 14 critical conference rooms, upgrading them to the Microsoft Teams Rooms platform. Diversified was tasked with overhauling the systems while ensuring seamless, secure, future-ready technology and ongoing support in order to establish a new operational standard across the board.

## WHAT WE DELIVERED

- 14 optimized conference rooms with Microsoft Teams Rooms for seamless, secure collaboration
- Tailored designs based on strategic meetings with USAF stakeholders to meet unique needs
- Expanded partnership for redesigning all conference rooms with future-ready technology
- Reliable, uninterrupted performance with dependable managed services

## IMPACT

By upgrading to Microsoft Teams Rooms, USAF has transformed their secure communications. The new conference rooms prioritize user experience with consistent, intuitive technology so personnel can focus on the mission at hand—enhancing overall operational efficiency with mission-critical communications that are equipped to meet tomorrow's challenges head-on.
