

US GOVERNMENT

Modernizing Media, Securing Missions

Empowering Government Communications
with Advanced Tech Media Solutions

Industry: **Federal Government**

Location: **Washington, D.C.**

In today's fast-paced world, information is power and the need to disseminate it quickly and effectively is paramount. The U.S. Government needed to modernize its outdated 12-year-old broadcast facility. Diversified was enlisted to replace the aging infrastructure with a ST 2110 routing platform, ensuring efficient operation and strong cybersecurity measures throughout the upgrade process.

WHAT WE DELIVERED

- State-of-the-art ST 2110 platform replacing outdated baseband video and audio systems.
- Enhanced performance and reliability of signal routing, adhering to industry standards.
- Seamless integration of all affected production equipment across the facility.
- Clear communication channels established for proactive issue resolution.
- Strategic planning and risk management ensuring zero disruptions and technical issues.

IMPACT

The U.S. Government transformed its aging broadcast facility into a cutting-edge powerhouse capable of efficient mass internal distribution. With the implementation of the ST 2110 routing platform, the new tech enhanced capabilities, ensuring timely, reliable multimedia production without glitches, delays, or compromising quality.
